Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the 1.132 Declaration filed October 24, 2003, along with the examples in the present specification have overcome the rejections of record. More specifically, the 1.132 declaration shows that an Al-Zn-Mg-Cu alloy with the presently claimed alloying ranges complete with 0.03% Be exhibits unexpected results (higher fracture toughness and more uniform properties) with regard to the prior art of Vernam, which contains no Be. The specification shows said unexpected results are commensurate in scope with the entire claimed range of 0.0001-0.05% Be (see Tables 1 and 2 of the instant specification).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
